

— NEW STRATEGIC ALLIANCE

Let's turn project data into execution certainty

AWP Labs' planning and project-controls expertise joins Lekapp's digital platform for capturing, controlling and visualizing project information — straight from the field.

Project Controls

Digital field management

Industry challenges

Traditional project management no longer meets the demands of construction and mining.

01

Litigation & claims

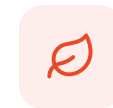

Disputes between parties escalate into long, costly legal battles.

02

BIM mandate

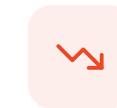

Regulatory obligation to adopt BIM methodology across projects.

03

Carbon footprint

Growing pressure to reduce the environmental impact of every project.

04

Cost overruns

Poor planning quietly erodes the margin of the whole project.

Services

Three integrated services, one source of truth — backed by the alliance's project-controls expertise.

01

Digital Technical Office

Digitalized technical and document management, with automatic progress reports straight from the field.

02

4D BIM Visualization

Real progress over the BIM model, synchronized with the Gantt schedule to compare planned vs. executed.

03

360° Virtual Tours

Remote supervision with drones and 360° cameras: objective, traceable evidence of the whole site.

Digital Technical Office

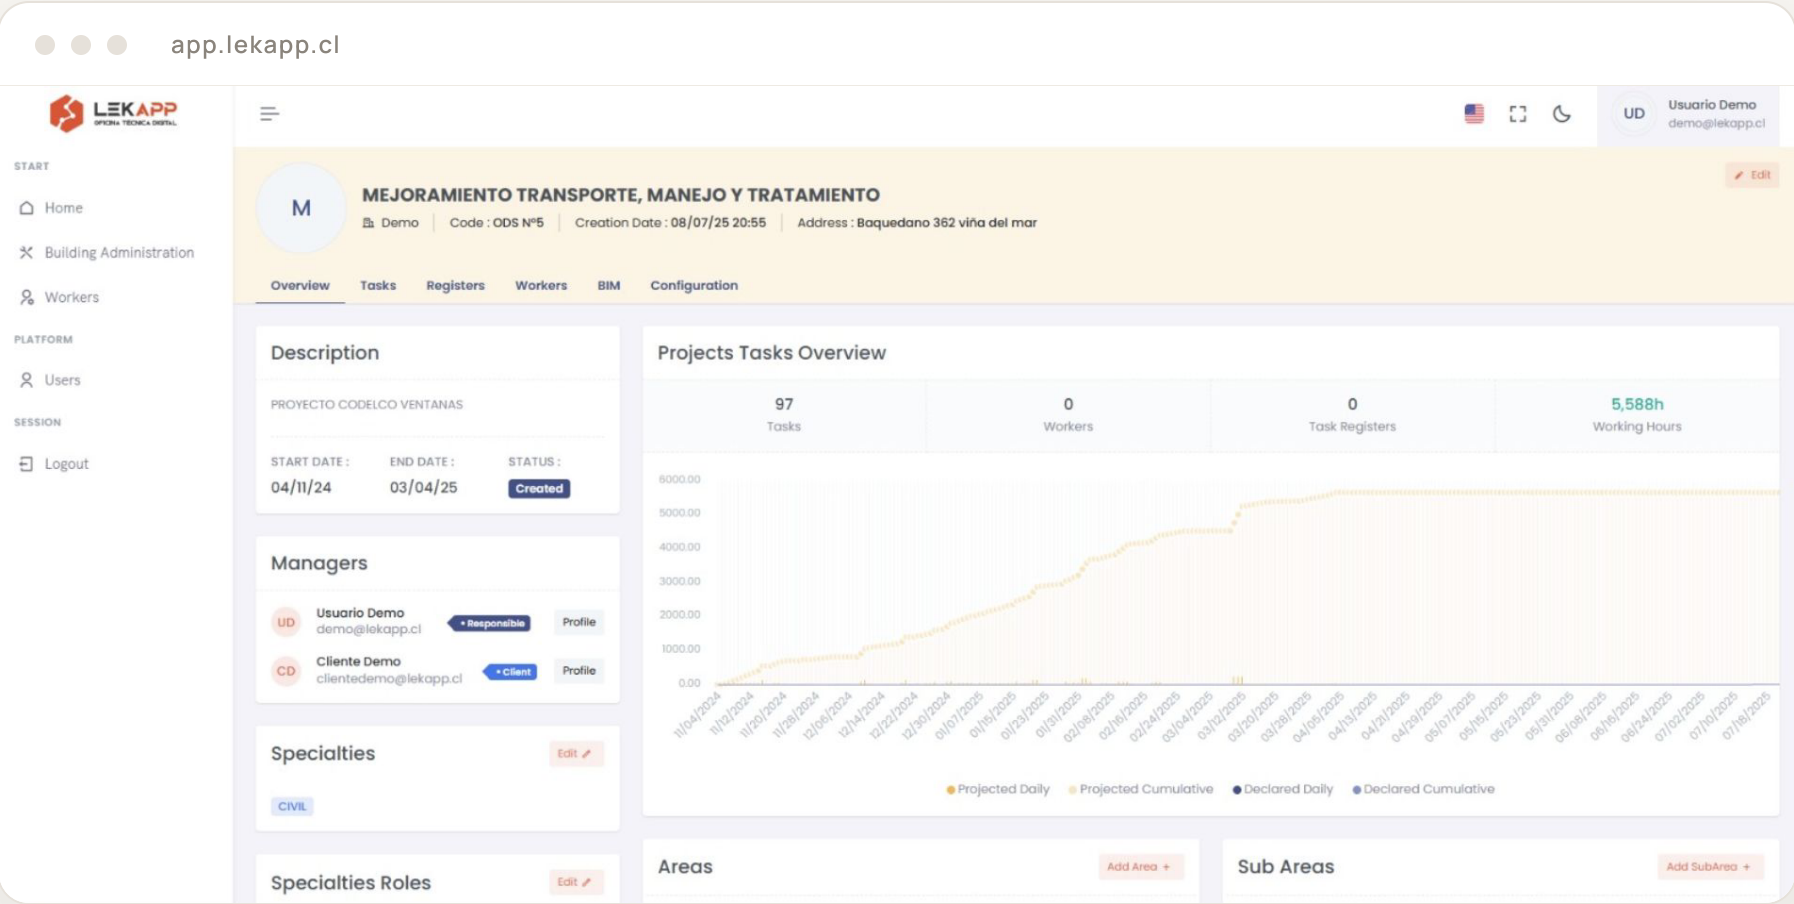

- ### Digitalized management

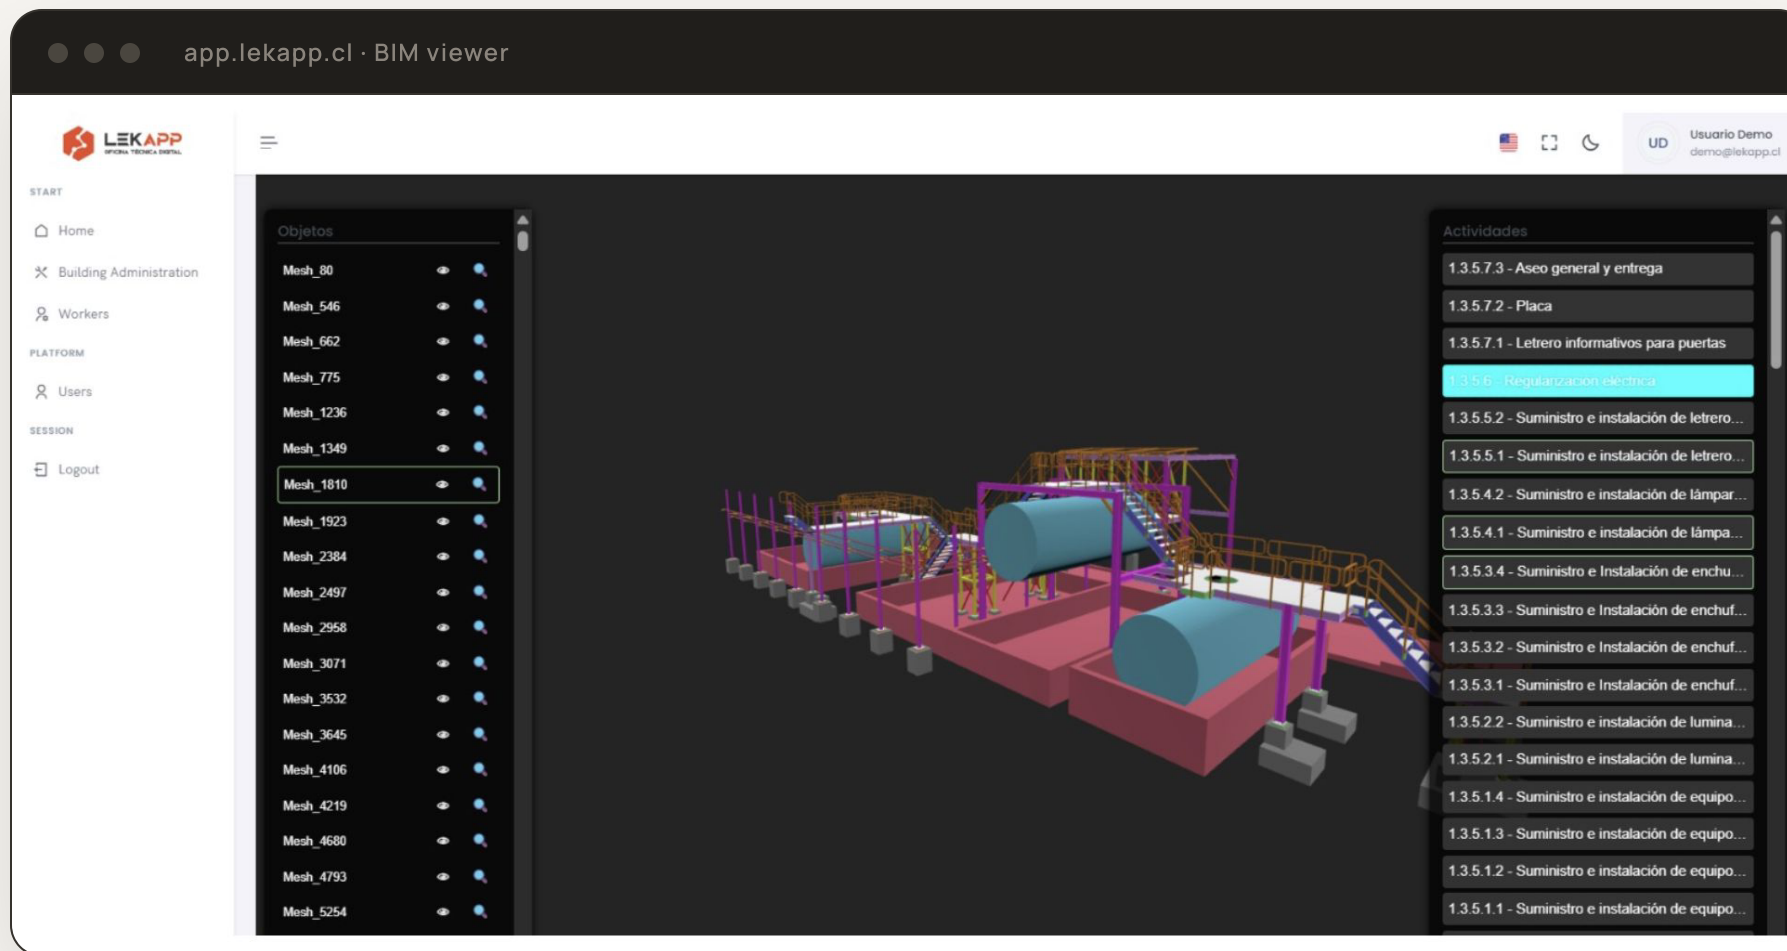

Technical and document workflows on a single platform.
- ### Automatic reporting

Progress reports generated without operational overhead.
- ### Aligned teams

Disciplines, contractors and owner over the same information.
- ### NFC-enabled apps

Progress and attendance logged right on site.

SERVICE 02

4D BIM Visualization

Broad compatibility

Works with Revit, IFC and other standard formats.

Visual progress control

Actual site progress rendered over the BIM model.

Planned vs. executed

Synchronized with the Gantt schedule at every cut-off.

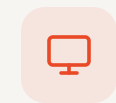

Early warnings

Deviations flagged in time for well-informed decisions.

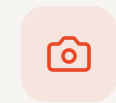

SERVICE 03

360° Virtual Tours

No site visit needed

Capture the real state of the project from anywhere.

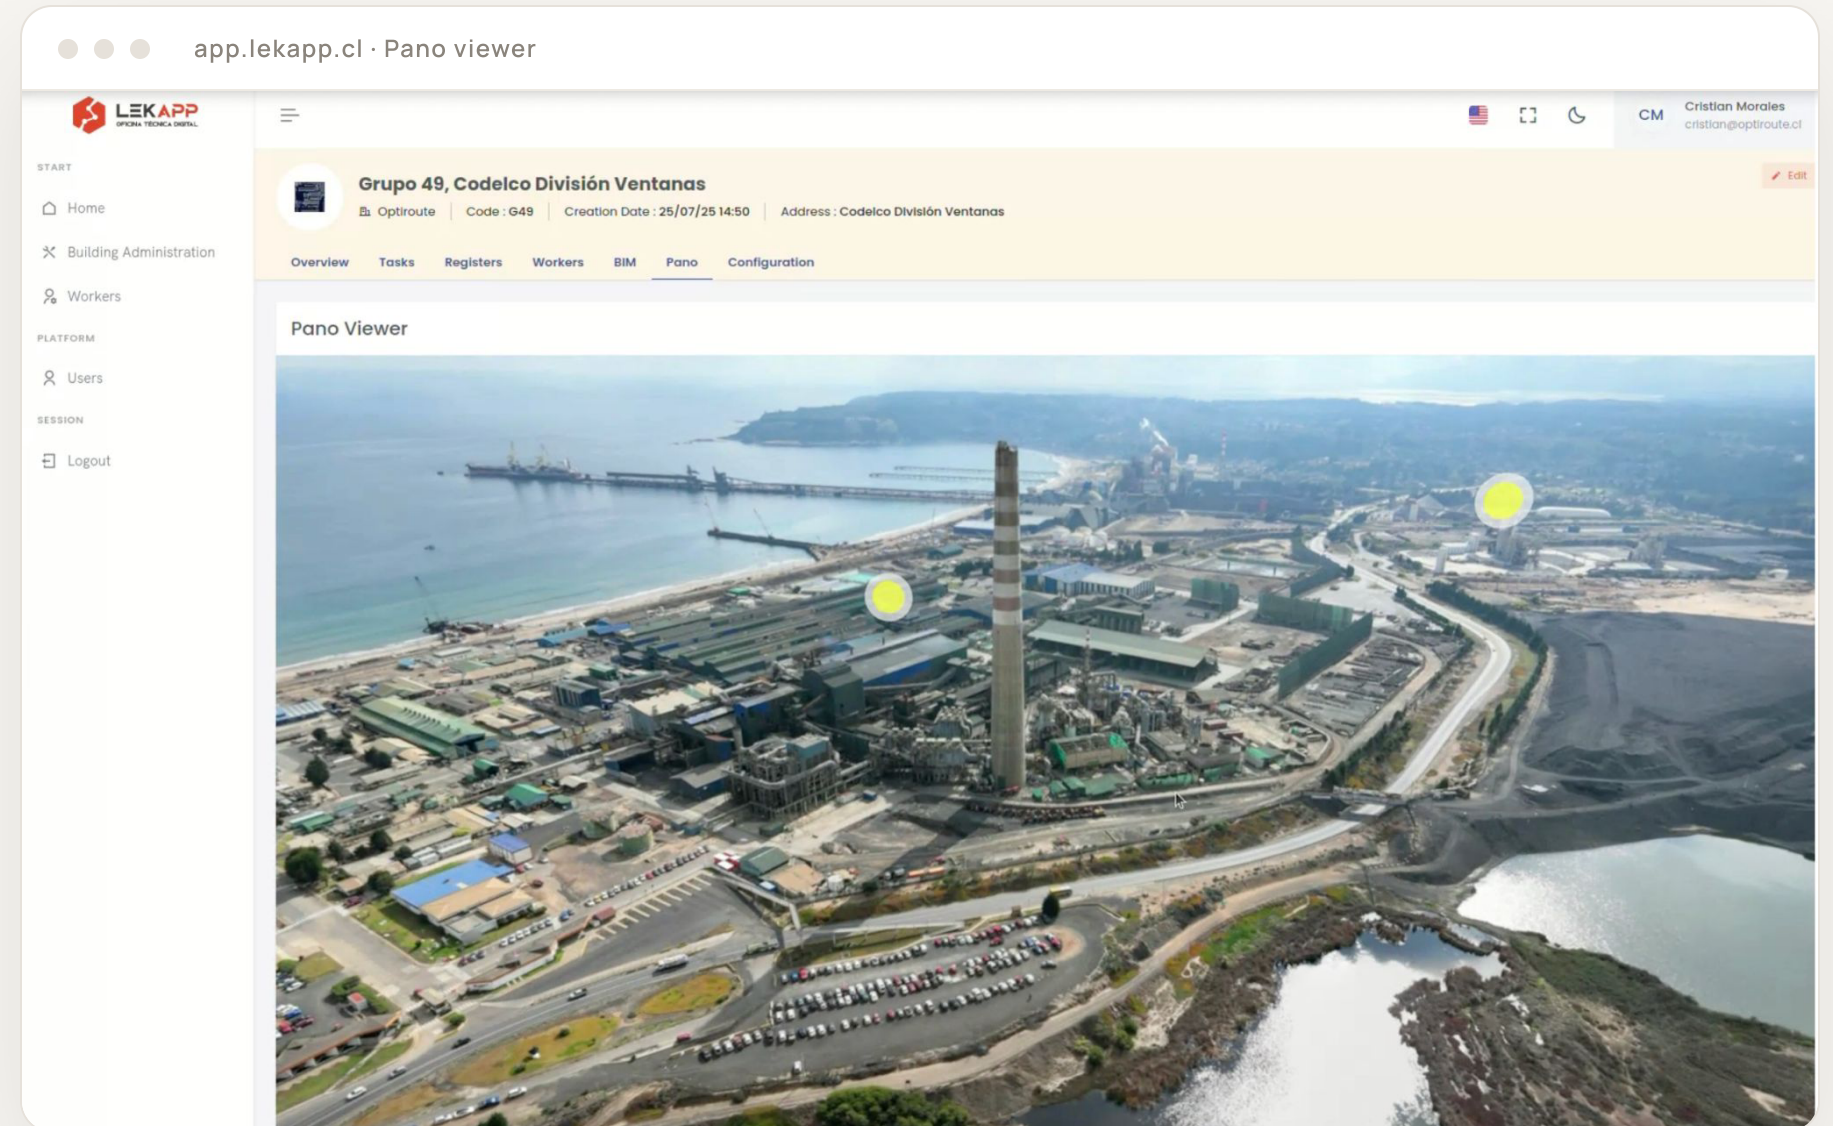

Drones & 360° cameras

Virtual tours and objective evidence of the whole site.

Historical record

A traceable timeline of the work's evolution.

What the alliance delivers

For mining and industrial projects, planning expertise and field data working as one.

Planning–field alignment

What was planned and what happens on site finally match.

Real-time visibility

Project progress visible the moment it is captured.

Traceability & control

Deviations tracked and controlled before they become claims.

Actionable 4D reporting

4D BIM visualization and reports teams can act on.

Faster decisions

Better-informed calls, made while they still matter.

Stronger collaboration

Owner, contractors and specialists on the same page.

— CONTACT

Let's keep talking.

Discuss your needs, schedule a demonstration or request a tailored quotation — we'd be delighted to explore how this alliance can add value to your project.
